

## OUR MISSION

The Consortium for Resilient Young Children is a collaborative of mental health and early childhood organizations that promotes the social and emotional development and well-being of young children, strengthens the capacity of all adults who care for them, and advocates for coordinated, aligned systems. The Resilient Children & Families Program (RCFP) is a service of The Consortium.

**27**

early childhood education programs

**229**

early childhood professionals trained in strength-based approaches

**1,252**

children enrolled in programs served by the Resilient Children & Families Program

**1,146**

families benefitting from the Resilient Children & Families Program best practices and services

# Southwest Ohio & Northern Kentucky

**107** Neighborhoods

**76** Zip Codes

**8** Counties

## Early childhood professionals increased their knowledge of RCFP best practices and ways to implement 2-Gen trauma-informed strategies in their scope of service:

**75%** reported increased knowledge of protective factors

**85%** reported increased confidence in addressing child behavior and family stress

**100%** measured on the RCFP validation tool improved in at least 2 RCFP content areas that included attuning to the inner children, creating supportive environments, and partnering with families

## Early childhood programs built the capacity to replicate RCFP practices:

**50%** of organizations completed instruction and demonstrated capacity to independently deliver RCFP professional development and coaching

**88%** of coaches-in-training reported increased knowledge of RCFP practices

**85%** of coaches-in-training reported improved abilities to provide instruction on RCFP best practices and promoting protective factors

**66%** of coaches-in-training reported strong confidence in offering coaching and consultation services

## Protective factors and social emotional well-being are strengthened for young children and their families:

**91%** of families reported use of practices that support children’s social emotional wellness

**86%** of families report practices that promote their resilience

**76%** of families at risk for toxic stress participated in a motivational interview and were connected to resources

**87%** of children were assessed as age appropriate on social emotional scale

**83%** of children assessed with an “area of need” demonstrated improved social emotional skills
